

NEW EXAMINATION
MOCK • SCIE 03
Duration: 2 Hours 3 Minutes

INSTRUCTIONS:

SECTION A

Instructions for section

1. A physical change is a change in the physical properties of a substance, but the substance remains the same.
(a) True
(b) False
2. The particles in a liquid are closely packed but can move around each other.
(a) True
(b) False
3. During the adult stage of the housefly life cycle, it primarily focuses on laying eggs.
(a) True
(b) False
4. In the water cycle, condensation refers to the process of water vapor turning into liquid water.
(a) True
(b) False
5. Matter is anything that has mass and occupies space.
(a) True
(b) False
6. The particles in a solid are closely packed and have a fixed shape.
(a) True
(b) False
7. Atoms of the same element can have different numbers of electrons.
(a) True
(b) False
8. During the adult stage of the housefly life cycle, it does not feed and survives on stored nutrients.
(a) True
(b) False
9. An element is a pure substance made up of only one type of atom.

- (a) True
 - (b) False
10. The main purpose of the pupal stage in the housefly life cycle is to eat and grow.
- (a) True
 - (b) False
11. Crop residues, such as leftover plant material after harvesting, can be used as organic matter in the soil.
- (a) True
 - (b) False
12. In the water cycle, evaporation occurs when water changes from a liquid to a gas, usually from the surface of oceans and lakes.
- (a) True
 - (b) False
13. Filtration is a method used to separate mixtures based on differences in boiling points.
- (a) True
 - (b) False
14. The water cycle is driven by the sun's energy, which causes water to evaporate from various sources.
- (a) True
 - (b) False
15. The life cycle of a housefly is an example of incomplete metamorphosis.
- (a) True
 - (b) False
16. The periodic table arranges elements in order of increasing atomic number.
- (a) True
 - (b) False
17. Aquaculture is a method of animal production that involves the cultivation of plants.
- (a) True
 - (b) False
18. Chemical changes in matter involve a change in the chemical properties of the substance.
- (a) True
 - (b) False
19. Housefly larvae, also known as maggots, feed on healthy plants and fruits.
- (a) True
 - (b) False
20. A compound can be broken down into simpler substances by physical means.
- (a) True
 - (b) False
